Top 10 states for utility- and small-scale solar (combined) generation in 2023. Find data for all 50 states and the District of Columbia in the full dataset.

Solar power includes solar farms as well as local distributed generation, mostly on rooftops and increasingly from community solar arrays. In 2024, utility-scale solar power generated 219.8 terawatt ...

In 2024, net solar power generation in the United States reached its highest point yet at 218.5 terawatt hours of solar thermal and photovoltaic (PV) power.

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

Top biggest solar PV stations in the United States 2024. PV parks, PV farms. (Updated September 2024) Get familiar with our list of the largest US-based solar photovoltaic plants with a capacity ...

This article breaks down the explosive growth of solar energy in America, state leaders like California and Texas, and how you can join the solar revolution. Learn about costs, incentives, ...

Rooftop solar installation is mainly done by small- and medium-size companies, which leads to a wide variety of approaches and cost variation. The country's top 10 installers represented a...

To power the U.S. solely with solar energy, it would require around 10,000 square miles of solar panel transmission, with a combination of rooftop and land solar panels, contributing to a sustainable ...

There are over 5 million solar installations in the United States, delivering clean, affordable, reliable energy to American communities.

Solar panel power generation room in the United States

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...
