OverviewTypesUnitsAt the top of Earth's atmosphereOn Earth's surfaceApplicationsSee alsoBibliographyThere are several measured types of solar irradiance. o Total solar irradiance (TSI) is a measure of the solar power over all wavelengths per unit area incident on the Earth's upper atmosphere. It is measured facing (pointing at / parallel to) the incoming sunlight (i.e. the flux through a surface perpendicular to the incoming sunlight; other angles would not be TSI). The solar constant is a convention...
