With utility-scale clean power now exceeding 320 GW nationwide--enough to power nearly 80 million American homes--the data shows how rapidly private companies are responding to ...

Solar PV and wind project pipeline, 2020-2025 - Chart and data by the International Energy Agency.

According to the latest U.S. Solar Market Insight Report from Wood Mackenzie and the Solar Energy Industries Association (SEIA), the contracted pipeline has ballooned to a record 37.9 ...

Below is a breakdown of the power pipeline currently being built in terms of power source and geography, and how the final power generation mix will be impacted once new projects come ...

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.

As of February 2025, China was by far the country with the largest prospective capacity for utility-scale solar power plants.

The pipeline of prospective utility-scale solar and wind capacity grew by a fifth last year, but the world's richest countries account for only a fraction of new construction, according to a new ...

Almost 70 gigawatts (GW) of new solar generating capacity projects are scheduled to come online in 2026 and 2027, which represents a 49% increase in U.S. solar operating capacity ...

Community solar refers to any solar project or purchasing program, within a geographic area, in which the benefits flow to multiple customers, such as individuals, businesses, nonprofits, ...

The US solar pipeline remains strong, with 23 GW of new module capacity, 34 GW of cell capacity, 25 GW of inverter capacity, and 95 GWh of battery cell capacity either under construction or...
