What is an SWMC Drilling Rig? SWMC drilling rigs are highly efficient and versatile machines designed for drilling in tough environments. In photovoltaic engineering, they are essential for creating stable ...

T4 VELSON rigs, masts, hammers, and drill pipes use industry-standard connections, ensuring easy integration with any existing OEM excavators. Our equipment and product experts specialize in building drill packages ...

With intelligent sensor fusion, AI-powered vision systems, real-time production data, and edge computing, the most advanced construction autonomy is now available for piling on solar farms.

New case studies highlight how artificial intelligence, advanced hardware, and innovative business models are enabling success in drilling automation.

A complete range of drilling control rooms, advanced operator chairs, drilling instrumentation systems, and monitoring systems are available for land and offshore applications.

Equipping Mincon solar drilling solutions with Trimble Groundworks technology provides stakeless navigation, positioning accuracy and as-built data that enables solar contractors and installers to build ...

The Precise system connects with key rig components via remote I/O on the drawworks, top drive, mud pumps, and drill floor. Control everything from the driller's cabin using touchscreens, discrete operators, and joystick ...

It is designed to enhance safety, efficiency, and precision on drilling rigs by automating various tasks traditionally performed manually in hazardous areas known as "red zones" on the rig floor.

The climate-controlled driller's cabin is custom made and designed to optimize available drill floor space.

Solar-powered automated cabine drilling site

Three-dimensional modeling of the rig floor enables ideal positioning of the driller's control chair, enhancing safety ...
