This study evaluates the policy and regulatory environments for storage deployment and applies state-of-the-art modeling tools to understand the technical, economic, and policy drivers for ...

As countries are meeting at COP28 to brainstorm clean and just energy transitions to combat the climate crisis, it is time for South Asia to leverage the power of regional energy trade to ...

Wärtilä has delivered a number of projects in the region, including Singa-pore's first-ever pilot grid-scale battery energy storage system (BESS) and several large-scale projects in the Philippines, building on ...

Singapore has surpassed its 2025 energy storage deployment target three years early, with the official opening of the biggest battery storage project in Southeast Asia.

The project marks a new start for GCL Energy in the field of user-side energy storage in Nanjing, with a total installed capacity of 1.165 MWh and a peak charging and discharging capacity of ...

In this post, I delve into 10 compelling case studies from across South Asia, showcasing how countries like India, Pakistan, Bangladesh, Sri Lanka, and Nepal are harnessing storage...

We conducted scenarios-based capacity expansion modeling to assess when, where and how much energy storage can be cost-effectively deployed in India through 2050.

ES can complement variable renewables, but new investments in ES are not necessarily needed to integrate large amounts of renewable energy (e.g., GTG study for India).

Building fully integrated regional grids, long-distance transmission lines and grid-scale storage technologies is imperative for Southeast Asia so that countries can start capitalising on their ...
