Faran Company which was established 1989 in Iran is a leading company in importing and producing electrical backup systems such as UPS, Stabilizers, inverters, batteries and solar equipments.

Iran's Supreme Council for Economic Coordination (SCEC) has approved the allocation of \$1.5 billion for the installation of solar panels in response to the country's ongoing energy crisis.

The company specializes in designing and implementing solar power stations, offering a range of solar energy equipment including panels, inverters, and battery systems.

Performance of two types of solar panel systems, fixed and sun-tracking, were evaluated in this study in two different regions: Tehran and Qazvin.

As nations grapple with rising energy consumption and the drawbacks of fossil fuels, the shift towards renewable energy sources like solar power is gaining momentum.

Many solar firms have described Iran as a tough country to do business in, so putting up the first ever large-scale plants came with some unique challenges.

Engineered entirely by local specialists, the system addresses key challenges in solar plant construction, such as complexity and high costs associated with installing separate components.

Fitco, being the representative of this company, possesses the capability to provide high-quality and affordable products swiftly, and this capability is dedicated to the development of the solar power ...

Developing a supply chain for a solar module manufacturing operation in Iran presents a unique set of opportunities. The country's industrial strength in glass and aluminum provides a solid ...

Tehran integrated solar module equipment is affordable

Imports: A Short-Term Necessity Iranian companies seeking to expand solar power generation currently face shortages of high-efficiency panels that meet international standards. China ...
