Standing at an astonishing height of 260 meters with a rotor diameter of 220 meters, it boasts a remarkable power capacity of 14 MW. Its colossal blades, each stretching 107 meters, are engineered...

In a stunning display of technological prowess, China has completed the construction of the world's largest wind turbine, a 607-foot titan capable of producing 26 megawatts of power, further ...

This is GE's Haliade-X nacelle--the heart of the world's most powerful wind turbine. With a colossal 12MW output and 107-meter blades, it can generate enough electricity to power over ...

With a capacity to generate 15 megawatts of power, the Vestas V236-15.0 MW is the largest and most powerful wind turbine as of 2025 to have been commercially deployed.

The largest wind turbine is the MySE 16-260, built by Mingyang Smart Energy (China) for the China Three Gorges Corporation (CTG). The MySE 16-260 has a rotor diameter of 260 m (853 ft), with ...

A planned supersized floating wind turbine with two spinning heads will generate nearly double the amount of energy as the current record-holder

China's S1500 airborne wind turbine completes maiden flight, becoming the world's largest floating wind-power generator.

List of largest wind turbine models, based on rotor diameter and wind turbine sizes. Learn how different models of wind mills impact energy production.

This is a list of the most powerful wind turbines. The list includes wind turbines with a power rating that is within 5 MW of the current most powerful wind turbine that has received customer orders that is at ...

The world's largest wind turbine generator

The MySE 16-260 earns its largest-ever tag thanks to its rotor diameter of 260 meters (853 feet) and its swept area of 53,902 square meters (580,196 square feet); it's also the most ...
