Solar photovoltaic and solar thermal power plants provided about 4% of total U.S. utility-scale electricity and accounted for 18% of utility-scale electricity generation from renewable sources ...

There are over 5 million solar installations in the United States, delivering clean, affordable, reliable energy to American communities. Read SEIA's Press Release on this historic milestone.

United States of America generates solar-powered energy from 3,272 solar power plants across the country. In total, these solar power plants has a capacity of 37905.2 MW.

Each month, we track solar projects in the state and update our list of the largest solar farms in the US. As of February 2026, there are 6,960 utility-scale solar farms in the US, according to Cleanview's ...

o In addition to the 11 states generating more than 10% of their electricity from solar in 2024, another eight states and territories generated more electricity from solar than the United States ...

The United States Large-Scale Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. photovoltaic (PV) facilities with capacity of 1 megawatt or more. It includes ...

According to the U.S. Department of Energy, the United States added 20,2 gigawatts (GW) of solar energy capacity in 2022, bringing its total installed capacity to 142.3 GW. This solar capacity is ...

Find up-to-date statistics and facts on the solar photovoltaic industry in the United States.

The SEIA report tallies all types of solar energy, and in 2007 the United States installed 342 MW of solar photovoltaic (PV) electric power, 139 thermal megawatts (MW th) of solar water heating, 762 MW th ...

There are 877 Solar photovoltaic power plants in United States as of July, 2025. Our database covers major

Total number of solar power plants in the United States

metropolitan areas including Rosamond and Starbuck, which feature substantial ...
