What is a 10kVA UPS system?

10kVA UPS systems available from Server Room Environments include floor standing and 19inch rack mount uninterruptible power supply systems for comms rooms, server rooms and small datacentre applications. The UPS will support loads up to 10kVA and the kW-rating will vary depending on the output power factor of the UPS.

What is a rackmount server?

Rackmount servers with hot-swap drives allow for any drive to be removed and replaced whilst the system is running and remains completely uninterrupted. Rackmount server with 2.5" disks offer energy savings, reduced cost, and increased flexibility. Rack mount servers with 3.5" hard drives offer larger storage capacity than 2.5" drives.

What are rackmount servers with fixed hard drives?

Rackmount servers with fixed hard drives offer a cheaper alternative to hot-swappable drives, bringing the total system cost down when hot-swappable hard drives are not required. Rackmount servers with hot-swap drives allow for any drive to be removed and replaced whilst the system is running and remains completely uninterrupted.

What is a cyberserve rack server?

View Range Perfect Appliance Servers, the CyberServe range of Intel Atom based rack servers are designed for light processing tasks. Designed and built for the appliance server market where an extremely low power consumption of less than 10W is required and 100% server up-time is of up most importance.

Rackmount Servers or rack servers available in 1u, 2u, 3u, 4u and 5u form factors with SAS and SATA drive technology. SMB and Enterprise rack servers

Servers - Shop Dell servers for compute, including rack, tower, Edge, and modular solutions. Find the right server to power your small business to enterprise needs.
