-----

A report from the Ministry of Industry, Energy, and Mining (MIEM) reveals that Uruguay will need to expand its capacity for renewable energy generation to meet the growing demand in the ...

The very strong incorporation of generation plants based on wind and solar resources has allowed Uruguay to systematically rank second globally, after Denmark, in terms of the share of variable ...

Uruguay's current installed wind power capacity is 1,500 megawatts (MW) and its photovoltaic power capacity is 300 MW. Spinelli says the expansion plan developed by her ...

Este boletín presenta un análisis cuantitativo y cualitativo de la evolución de la energía solar entre 2014 y 2024, comparando los avances globales y nacionales, destacando innovaciones...

To ensure this mix remains as clean as possible in the face of growing electricity demand, the next phase of Uruguay's energy transition is about to begin: major solar expansion.

Uruguay built a power grid that runs 99% on renewables--at half the cost of fossil fuels. Here's how its bold energy overhaul became a global model.

Towering white wind turbines and glistening solar panels are now as much a part of the iconography of Uruguay as the grass itself, though they began to pop up across the country only in ...

El proyecto que prevé instalarse en Punta del Tigre fue adjudicado en octubre de 2024 al consorcio integrado por las empresas Prodiel Energy de España y Teyma de Uruguay, y sirvió como prueba ...

Uruguay is reinforcing its status as a global renewable energy powerhouse by expanding its solar capacity to meet rising electricity demand. Already boasting a grid where over 98% of its ...

## Uruguay 37 MW of solar

In 2024, Uruguay's state-owned electricity company UTE inaugurated a large-scale photovoltaic solar park in Punta del Tigre as part of its broader plan to add 900 MW of solar capacity ...
