What is the victron - Freedom won integration?

The Victron and Freedom Won integration has been extensively developed and tested and is certified and supported by both companies. This manual is intended to offer Victron specific guidance when designing, installing, and commissioning a Victron - Freedom Lite system.

Does Freedom won provide a larger battery system?

Larger systems are provided by Freedom Won based on specific project requirements by installing multiple units of the same model battery in parallel. This manual covers the standard voltage models of the LiTE Home and Business HV and HV+ range from 15kWh up to 80kWh.

How does the Freedom won Lite battery work?

The Freedom Won LiTE batteries contain an advanced battery management system (BMS) that communicates via a CAN Bus protocol with the Victron GX device. The GX device in turn connects and manages the other compatible devices in the system.

How do I verify CAN BUS communication with the Freedom won Lite battery?

Correct CAN Bus communication can be verified by observing whether the Freedom Won LiTE battery is presented in the GX-device list under the name "Freedom Won LiTE" or "eTower". Note: In this section, the reference to "Color Control GX" refers only to that specific model of GX device and excludes the rest of the range.
