A module bracket (10) for supporting two adjacent photovoltaic modules (30) in a photovoltaic support (20). Each photovoltaic module (30) is provided with a mounting hole (301). The module...

The present application relates to a bracket system for a photovoltaic module. The bracket system of the photovoltaic module mainly comprises a bracket body, lower connecting members and...

A tracking type flexible photovoltaic bracket is provided, including photovoltaic assemblies, pillars, a driving member, direction-changing mechanisms, and two pulling ropes. Each of the pillars is ...

FST100 wurde als universales PV-Montagesystem für Dachmontage auf Schräg- und Flachdächern entwickelt. Durch die Verwendung patentierter Aluminium- Grundschielen,

From anti-theft bracket designs using biometric locks to experimental space-rated mounting systems, this sector's proving that even the most "boring" components can be engineering marvels.

This patent search tool allows you not only to search the PCT database of about 2 million International Applications but also the worldwide patent collections. This search facility features: flexible search syntax; ...

A photovoltaic bracket comprises a support component, wherein the support component is composed of at least two support structures; the rope assembly consists of three ropes which are erected...

The bracket can be manufactured by stamping at least two identical sections of metal from the sheet and then bending-up each section on its remaining uncut fourth side into a near-vertical position, so ...

A photovoltaic tracking bracket system, comprising a main shaft (1), a synchronous shaft (2), a driving source (3), and transmission mechanisms (4). The main shaft (1) has a cavity (10).

What are the patented photovoltaic brackets

The present invention relates to technical field of photovoltaic power generation, in particular it relates to a kind of photovoltaic bracket that may be disposed at container top.
