Commissioning tests (e.g., drone solar panel inspections, inverter efficiency measurements, I-V curve testing) are carried out to ensure that all components of solar power plants are designed, installed, ...

Our company's products serve the research and development department and test center of solar photovoltaic industry based on test standard 61215& IEC61730. At present, we are one of the few full ...

From factory inspections to performance, durability and reliability in real-world applications, we can help you build consumer confidence in your products. Our field inspectors are also ready to be on-site ...

With seven laboratories located in different climate zones and subject to varying weather conditions, we are able to offer our customers PV module testing that subjects their products to real-life challenges, ...

From PV Modules and System Components to Solar Thermal and proving Bankability, Intertek is your comprehensive source for all photovoltaic Quality Assurance, testing, inspection, and certification ...

Our state-of-the-art PV testing and certification centers provide both safety and performance testing from a single source, including facilities in: Shanghai, China; Taipei, Taiwan; Cortland, New York; and ...

Maximize the reliability and long-term performance of your solar modules with GroundWork's extended reliability testing services, designed to meet industry standards and increase bankability.

During type approval and certification of PV modules to required standards, a factory inspection of all production facilities is required. Whether you are a manufacturer or buyer of PV modules, our factory ...

We provide testing and certification for PV modules, components, and energy storage systems covering safety, performance, EMC, and efficiency. Our services include product development support, ...

What are the photovoltaic panel testing factories

DNV is accredited as a testing laboratory under ISO 17025 by ENAC. We have been carrying out tests under a multitude of international standards in the renewable sector for over 35 years, making it clear ...
