The vanadium redox battery (VRB), also known as the vanadium flow battery (VFB) or vanadium redox flow battery (VRFB), is a type of rechargeable flow battery which employs vanadium ions as charge ...

A Vanadium Flow Battery (VFB) is a type of battery in which both the positive and negative electrodes use circulating vanadium solutions as the energy storage medium.

In standard flow batteries, two liquid electrolytes--typically containing metals such as vanadium or iron--undergo electrochemical reductions and oxidations as they are charged and then discharged.

In contrast to lithium-ion batteries which store electrochemical energy in solid forms of lithium, flow batteries use a liquid electrolyte instead, stored in large tanks. In VFBs, this electrolyte is composed ...
