Can you use glass cleaner on solar panels?

Yes, you can use glass cleaners on solar panels but not too much glass cleaner for safety and environmental reasons, and especially if you have a lot of panels, that might take you some time to clean. Most importantly when using glass cleaners is to remove the residue of soap and chemicals with towels, paper, and water.

What is the best glass cleaning cloth?

Using microfiber cloths will prevent scratches on delicate surfaces such as your glass windows, leaving them with a streak-free shine. Use The Crown Choice Microfiber Cleaning Cloth to achieve a shining clean result. It is one of the best glass cleaning cloths on the market due to its highly absorbent and premium-grade materials.

Can you use soap to clean solar panels?

Unlike a pure alcohol cleaner, soap leaves a residue when cleaning which reduces the light intake - plus, it can act as a magnet and attract dust. When you use detergents to clean your solar panels, what happens is that the abrasive chemicals sometimes streak the glass of the panel or increase the risk of scratching the glass on the solar panel.

How to clean solar panels?

Here's a simple non-toxic recipe for glass cleaner: 1/4 cup vinegar, 1/2 teaspoon liquid non-abrasive soap or detergent, and 2 cups of water in a spray bottle. In drier areas when there is water rationing - the solar panels can be cleaned fairly well using an air-hose. Use a non-abrasive cleaning sponge or towel to wash the glass.
