Is a solar farm canceled or delayed?

A solar farm in Mona, Utah, on Aug. 9, 2022. More than \$14 billion in clean energy investments in the U.S. have been canceled or delayed this year, according to an analysis released Thursday, as President Donald Trump's pending megabill has raised fears over the future of domestic battery, electric vehicle and solar and wind energy development.

Why did companies cancel a new battery & electric vehicle project?

In April alone, companies canceled \$4.5 billion in investments in new battery, electric vehicle and wind projects in advance of the U.S. House's passage of a massive tax and spending package that would essentially kill federal clean energy tax credits.

Are battery and solar projects getting killed in record numbers?

Battery, solar, and wind projects are getting killed in record numbers. Here's a map of all the cancellations so far this year. This story is part of MIT Technology Review's "America Undone" series, examining how the foundations of US success in science and innovation are currently under threat. You can read the rest here.

How will new regulations affect wind & solar projects?

This includes outright bans and ambiguous restrictions on areas of land where wind and solar projects can be built, new requirements relating to equipment recycling and land reclamation, and changes to transmission legislation, all of which will likely add new regulatory burdens and upfront costs.

President Donald Trump's pending megabill has raised fears over the future of domestic battery, electric vehicle and solar and wind energy development.

Since October 2023, projects amounting to almost 11 gigawatts (GW) of wind, solar and energy storage have been withdrawn from the Alberta Electric System Operator project development ...

Battery, solar, and wind projects are getting killed in record numbers. Here's a map of all the cancellations so far this year.

- Businesses cancelled or delayed more than \$14 billion in investments and 10,000 new jobs in clean energy
